

## **Skilling Engineers for Professional Success**

There are 6000 engineering colleges and over 4000 management colleges in India and it is estimated that about 1.5 million engineering students enter the job market every year. Due to lack of awareness on available job opportunities, students with engineering and management degrees either compromise on the type of job that they select or relocate to other countries in search of good jobs. To guide the students on the options available to them in the country itself in public sector, explore on having one's own start-up in engineering field as also to familiarize them with how their engineering or management discipline operates in railways, Konkan Railway organizes a special training program for these students.

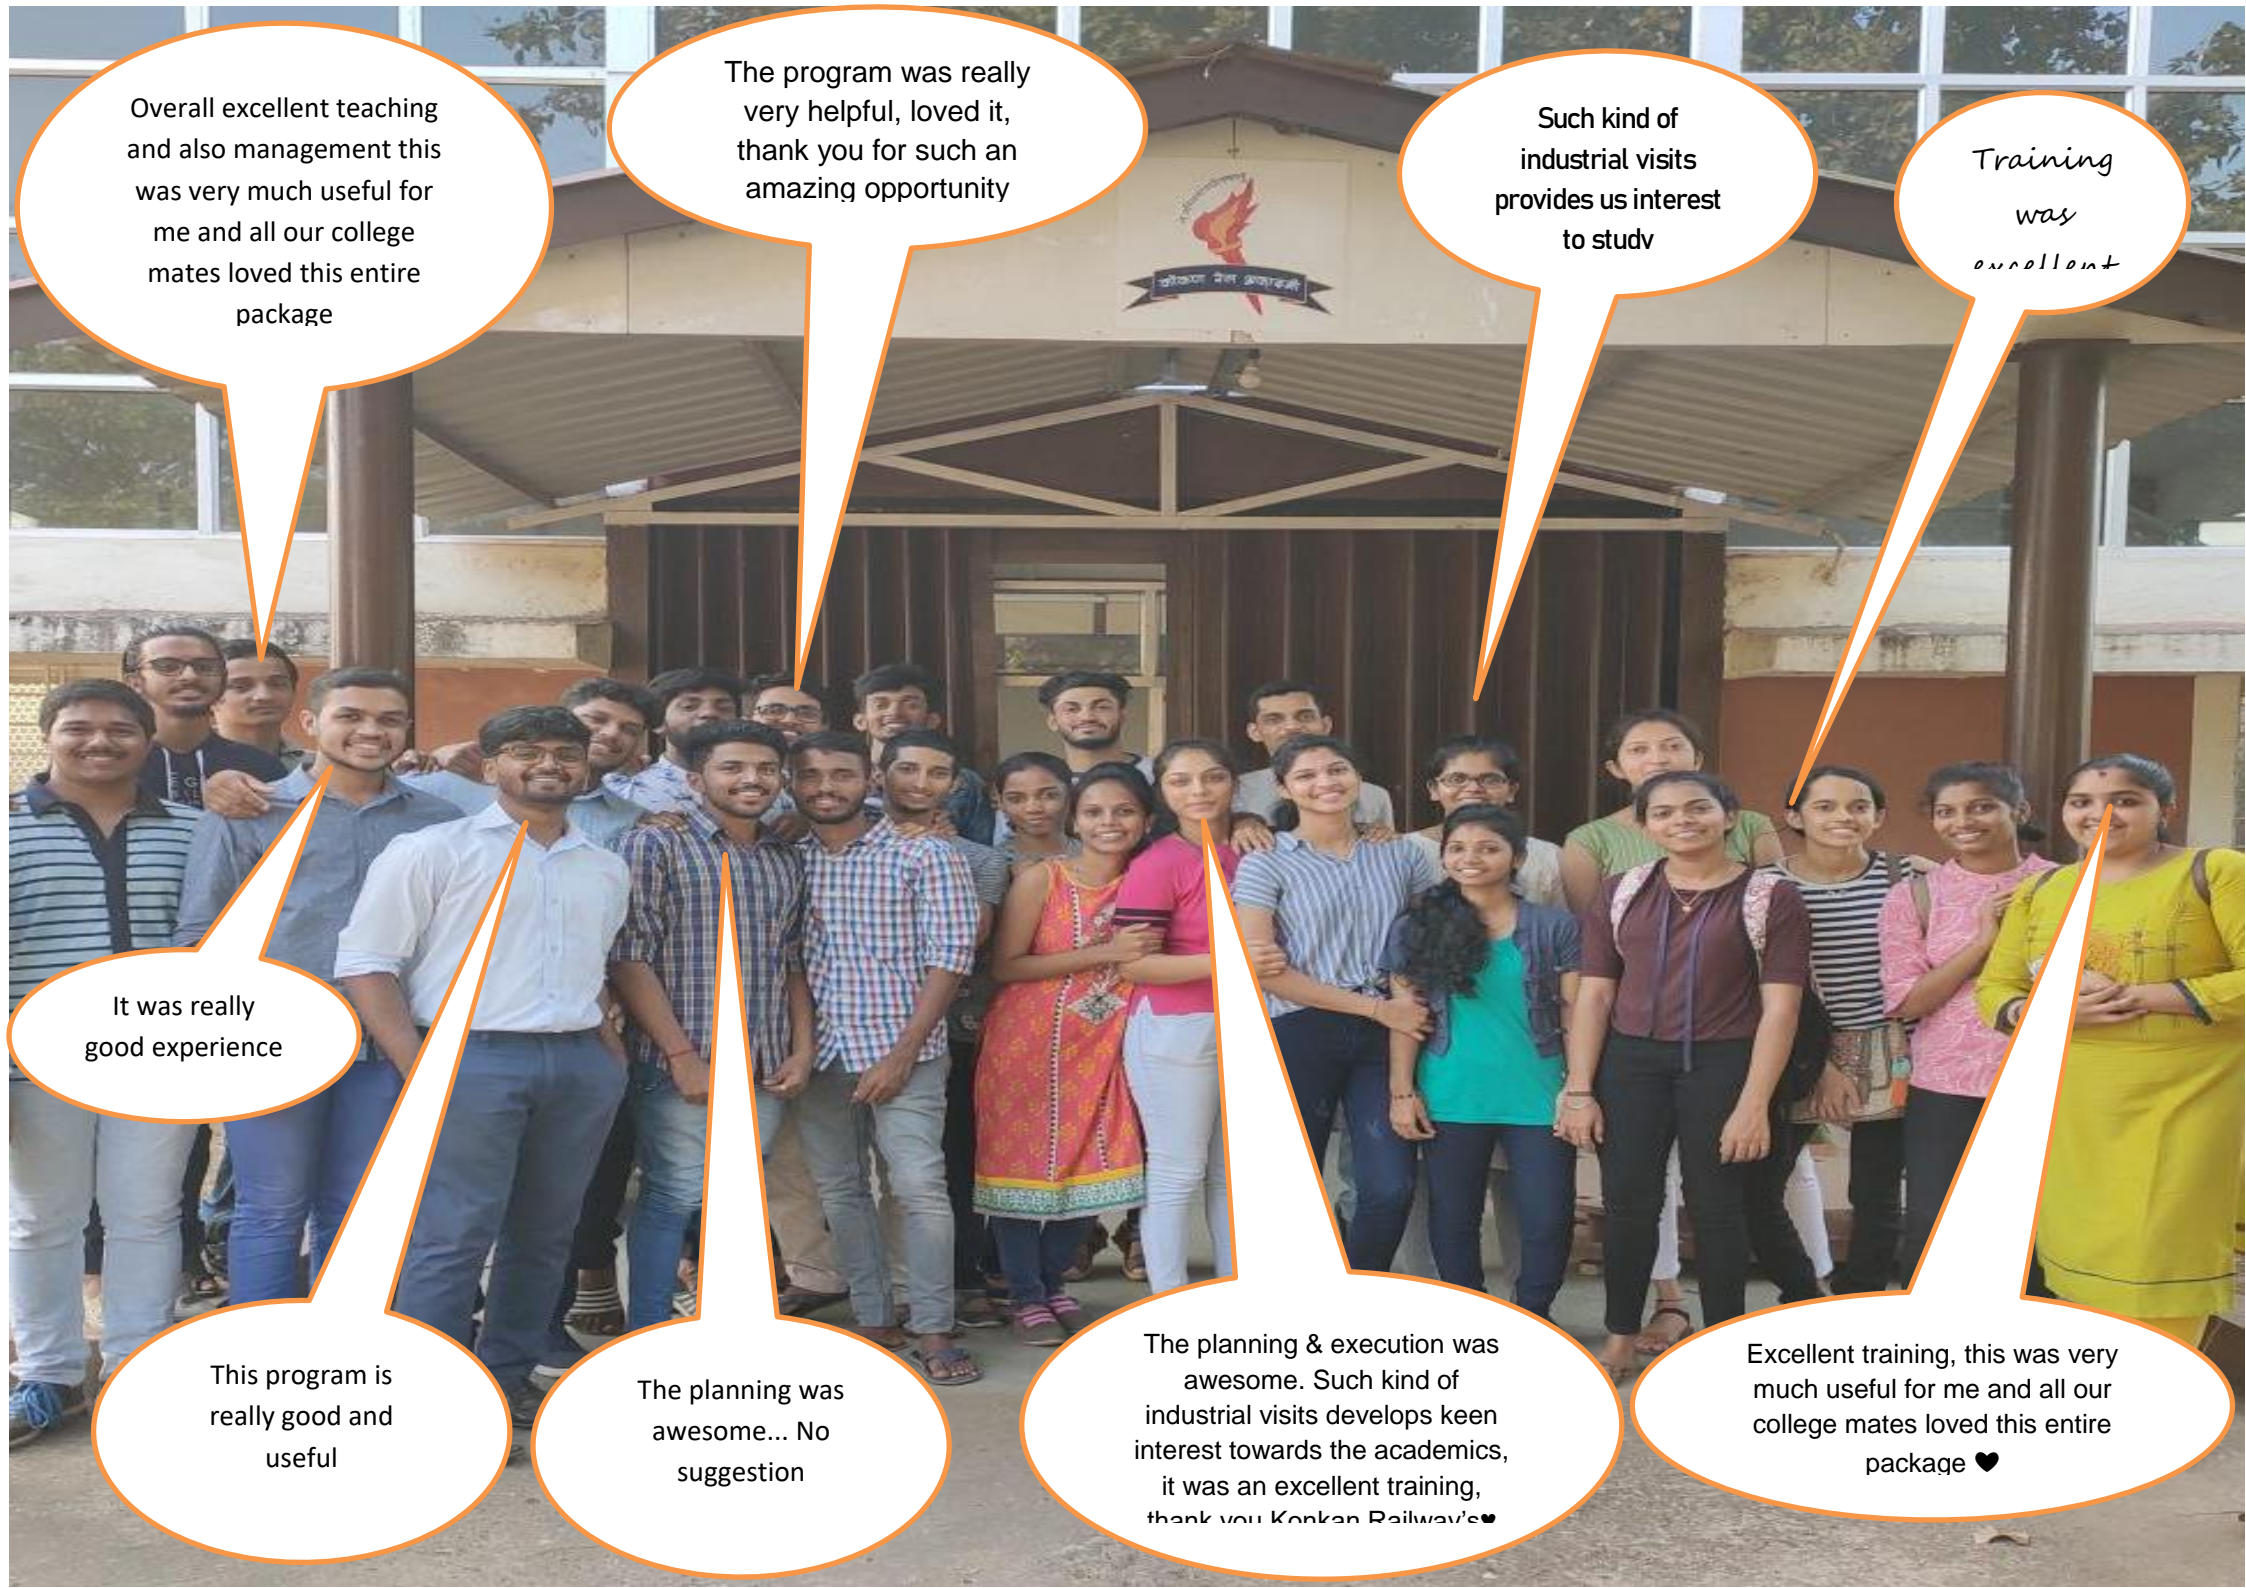

The training program is named as “**Skilling Engineers for Professional Success**”, popularly referred to as **SEPS** program. The program is of one week duration and is exclusively for the engineering students from Civil, Mechanical, Electrical, Electronics & Communications, and Computer Engineering disciplines and also for management students. The program is intended to give practical training in various management related and engineering streams in railways and get the students acclimatized to latest technologies and actual ground working. Field experts with years of work experience behind them, take sessions in the program. The program takes the students beyond theoretical levels.

The program involves 5 days of classroom training at Konkan Railway's training Academy at Madgaon plus additional days for field visit. The field visit is either on Konkan Railway route along the West Coast or its work sites at Jammu & Kashmir. The field visit on the Konkan Railway route is of two days and in case the students are interested in visiting the work site of KRCL at Chenab river in J&K State, the duration of field visit is 6 days. After the program, the students can undergo free internship at various departments/locations in KRCL, if they so desire, ranging from 15 days to 2 months based on mutual agreement.

A certificate from Konkan Railway is given to the students at the end of the program and internship too.

.....

Overall excellent teaching and also management this was very much useful for me and all our college mates loved this entire package

The program was really very helpful, loved it, thank you for such an amazing opportunity

Such kind of industrial visits provides us interest to study

Training was excellent

It was really good experience

This program is really good and useful

The planning was awesome... No suggestion

The planning & execution was awesome. Such kind of industrial visits develops keen interest towards the academics, it was an excellent training, thank you Konkan Railway's♥

Excellent training, this was very much useful for me and all our college mates loved this entire package ♥
