Profile

An IRSME (Indian Railway Service of Mechanical Engineers) Officer, having more than three decades of experience as a Rolling Stock Engineer on Indian Railways, looking after maintenance & operations management of locomotives, coaches and wagons at various locations across India.

Appointed as Director (Operations & Commercial), Konkan Railway Corporation Limited in September 2013 and Chairman & Managing Director in July 2016. As CMD, he is responsible for the following:

- 1 Running the railway system along the extremely challenging geographical terrain on the west coast of India.
- 2 Maintaining high standards of safety, punctuality and profitability.
- 3 Besides operating the railway, the Corporation is also into construction of railway infrastructure, utilizing its construction expertise in undertaking infrastructure projects across the country. The Corporation is currently constructing 53 kms of railway line in Jammu & Kashmir which will connect Kashmir valley to the rest of the nation. It includes many tunnels and The Iconic arch bridge on the river Chenab. Once completed it will be the highest Railway Bridge in the world.
